Qualideck® POWERED BY APT

NEW FROM QUALIDECK

COMPLETE THE SYSTEM.

QUALIPUR 702 LINE PAINT

Line striping is often the last item specified on a parking structure — and the first thing that looks worn. Qualipur 702 is a water-based 2K polyurethane line paint designed for use with Qualideck® traffic coatings.

ONE SYSTEM
Traffic coating and line marking designed to work together.

ONE MANUFACTURER
A single source for the coating and the line paint.

BUILT-IN COMPATIBILITY
A urethane line paint for the Qualideck system.

CLEAN FINISH
High-visibility markings for decks and walkways.

PART OF THE Qualideck. SYSTEM

Qualipur 702 is the line-marking component of the coating system.

STEP 01
QUALIPUR 152 / 182 PRIMER
Adhesion to concrete. Qualipur 182 adds a moisture vapor barrier.

→

STEP 02
QUALIPUR 252 MEMBRANE
Flexible waterproofing that bridges cracks and moves with the concrete.

→

STEP 03
QUALIPUR 372 / 582 TOPCOAT
Strong wearing surface built for traffic.

→

LINE MARKING
QUALIPUR 702
Crisp, high-visibility markings designed for the system.

THE PROBLEM
Peeling, fading or worn markings can make an otherwise finished deck look neglected — and repainting means added closures and traffic control.

THE FIX
Clean, crisp striping over a Qualideck-coated deck, supporting stalls, traffic flow, wayfinding, and accessible and EV spaces.

SPECIFICATIONS

TYPE	Water-based 2K polyurethane, semi-matte
PRIMARY USE	Parking decks & pedestrian walkways
PACKAGING	3.5 gallon pail (14.35 kg)
COVERAGE	1,312 linear ft./unit (4" line, non-porous smooth surface)
CURE	Tack free 1 hr · Foot traffic 3–5 hrs · Final cure 16 hrs
VOC / CLEANUP	< 50 g/L · Water
TEMPERATURE	Clean, dry surface, 50°F and rising (max 104°F)
WARRANTY	One-year APT performance warranty*

Typical values at 68°F / 50% RH; actual times vary with conditions. Not for use as specifications. See TDS. *Warranty terms: advpolytech.com

COLORS

- Yellow
- White
- Safety Blue
- EV Green

IDEAL FOR
Accessible and EV stalls.
